Product Change Notice

PCN#: EE-PCN19026
12/16/2019

CLASSIFICATION OF CHANGE:

End of Life (EOL)

DESCRIPTION OF CHANGE:

Specific nominal current ratings within the ABC and MDA families have been discontinued.

REASON FOR CHANGE:

Due to volume history, the product has been selected for end of life.

EXPECTED INFLUENCE ON QUALITY, RELIABILITY, AND PERFORMANCE:

There are no direct replacements for these specific ABC and MDA part numbers. There are other nominal current ratings near the EOL product current ratings within the ABC and MDA families that may be suitable in the application.

Most of the EOL fuses have equivalent nominal current ratings in the respective AGC and MDL families which have the same Vac interrupting ratings. This may allow for an AGC or MDL replacement in some applications.

Eaton recommends that any replacement fuse of the subject part numbers is reviewed for suitability in the application. Please consult the respective ABC, MDA, AGC and MDL data sheets for complete information.

PARTS FAMILIES AFFECTED:

Please see the following page for affected part numbers.

TIME SCHEDULE:

Product will continue to be available until inventory is exhausted.

SAMPLE AVAILABILITY:

ABC, MDA, AGC and MDL fuses available upon request

ISSUED BY:

Nick Stone
Global Product Line Manager – Circuit Protection

CONTACT INFORMATION:

For questions or comments, please contact your local [Eaton sales representative](#).
