

KITMPL115A1EVB Quick Start Guide

STEP
1

Unpack the board.
Verify package contents
according to the kit Web
site: www.freescale.com/sensortoolbox

Assemble the hardware by connecting a development board to the interface board. This board is intended for use with a pressure sensor interface board, purchased separately. More information can be found on the Web site.

STEP
2

At www.freescale.com/sensortoolbox download
the latest software version by
clicking the link. [Download Software](#)

All Sensor Toolbox kits use the same software and driver, so the install only needs to be done once. Follow the on-screen instructions to install the communication driver for the tool. Check back occasionally for software updates.

STEP
3

Plug in the USB and turn
the board on using the
power switch. Run the Sensor
Toolbox link on your desktop.
