Why Wilcoxon

1

Wilcoxon knows that the key to selling quality vibration monitoring sensors is to provide unbeatable reliability from our extensive product range backed by exceptional industry experience and support.

Employ our high performing accelerometers, cables, enclosures, power supplies and a wide range of accessories in your condition monitoring program and you will see **Why Wilcoxon** is number one.

Customer support

Fast and responsive turnaround on quotations to keep your project on schedule

Global network of partners to assist you with quoting, ordering and customer service

Dedicated customer account representatives provide personal attention to each order

Outstanding applications support to ensure you get the right product for the job

Expertise in engineering to the PhD level and over 200 years of combined industry experience

98% on-time delivery and the shortest lead times in the industry

Guaranteed In-Stock program promises select products ship the next business day

Knowledge about export compliance laws to ensure international shipments are not delayed

Reliability

Highest MTBF (mean time between failure) in the industry, average 25 years

Certified ISO 9000 Quality Management and ISO 14000 Environmental Management

State of the art manufacturing facility in Maryland, USA ensures precise control of all assembly and testing

True hermetic seal, backed by helium leak testing of sensors to 1×10^{-8} cc He/sec. What does this mean to you: 1 helium molecule escapes every 3.2 years compared to weak bubble tests that allow 1 helium molecule to escape every 2.78 hours resulting in 10,000 times more leakage

Ensured contamination-free sensor: final weld is completed in an inert atmosphere inside a drybox

Consistent product performance from piezoelectric crystal stabilization, ensuring accelerometer sensitivity doesn't drift over time, <1% sensitivity drift over 10 years

Lifetime Warranty ensures commitment to continuous product performance

Broad offering for one-stop-shopping

Extensive variety of accelerometer designs for any application

Comprehensive selection of 4-20 mA sensors and transmitters for simplified condition based maintenance

Widest selection of hazardous area certifications including FM, CSA, ATEX, IECEx, SIMTARS ratings of Class I Division 1 (Zones 0 and 1), Class I Division 2 (Zone 2) and Explosion Proof

Complete offering of cables, enclosures, power supplies, installation tools, cable assemblies, transmitters and alarms, plus all the accessories your project could need

Time-saving handheld instrumentation

Custom designed products

Competitive pricing on sensors, accessories, cables

Cutting edge technology keeps you ahead of the curve

Industries

Machines are a critical part of your manufacturing process, and proactive maintenance based on condition monitoring can provide savings up to 30% compared to conventional maintenance practices. Understand the condition of your rotating machines including pumps, motors, compressors, gearboxes and fans throughout your facility using the Wilcoxon Sensing Technologies® range of reliable, high performing vibration monitoring sensors and accessories.

From wind turbines and pulp and paper plants, through to steel mills and power generation, tens of thousands of Wilcoxon® sensors are currently in service around the world. Take a look at our website to explore the industries where our vibration sensors and accessories are put to use. And remember if you need help discussing your vibration monitoring requirements, and how we can help you succeed, we are a convenient email or phone call away.

Products

Vibration sensors improve machine reliability, reduce operating costs and minimize downtime as part of condition-based maintenance. Wilcoxon Sensing Technologies® products have set the industry standard since 1960. We supply a wide range of highly reliable sensors and everything that goes with them, to protect and monitor all types of rotating machinery, reduce unexpected failures and improve machine reliability.

We are your one stop shop for vibration analysis and condition monitoring solutions. Explore our broad range of products including accelerometers, 4-20 mA sensors, intelligent transmitters and instrumentation that provide accurate and reliable vibration measurements for many industries and applications. Whether you're purchasing just a few, hundreds or even thousands of sensors, we are ready to meet your needs.

Configurable vibration transmitters

General purpose accelerometers

Long-lasting sensors measure vibration across a broad frequency range for monitoring of most industrial machinery

- Motors, fans, pumps 600 - 7,200 RPM (10 - 120 Hz)
- Moderate speed gearboxes 60 - 60,000 RPM (1.0 - 1,000 Hz)
- Machine tool spindles 1,000 - 840,000 RPM (16.6 - 14,000 Hz)
- Paper machine rolls 30 - 600 RPM (0.5 - 10 Hz)
- Compressors 1,500 - 600,000 RPM (25 - 10,000 Hz)

Additional information	Useful in high g applications such as gearbox, turbine and compressor monitoring	Wide dynamic and frequency range. Compact construction to fit in tight spaces, laboratory grade	High temperature capability offers continuous monitoring in high temp environments, ideal in paper mill dryer environments	Side-exist sensor ideal for applications requiring operation in extremely high temperatures, ideal in paper mill dryer environments	High temperature performance in compact size for multichannel applications, ideal in paper mill dryer environments

Low frequency accelerometers

Our sensors have been the industry standard for performance and reliability for over 60 years

- Low frequency accelerometers to monitor slow turning machinery like wind turbines and cooling towers
- Pioneered condition monitoring for industrial applications
- Reverse wiring protection prevents damage to the sensor if the power supply is not properly connected
- Seismic sensors measure vibration to the sub micro-g level

Wilcoxon® model	786LF-500	787-500	793L	799LF	731A / 731A/P31
Description	Extremely low frequency accelerometer	Side-exit low frequency accelerometer	Premium low frequency vibration sensor	Premium low frequency filtered accelerometer	Ultra quiet, ultra low frequency seismic accelerometer
Sensitivity mV/g	500	500	500	500	10 V/g
Sensitivity tolerance	± 5%	± 5%	± 5%	± 5%	± 10%

Cable assembly ordering guide

Custom assembly identification: Ra-b-c-xx-d

R signifies cable assembly, for example: R6Q-0-J9T2A-16 [16 ft yellow Teflon® cable, 2 pin MIL-5015 IP68 connector to blunt cut].

- a** Find connector that mates to sensor
- b** Choose termination connector
- c** Select compatible cable type
- XX** Cable length (ft or m), including connectors
- d** Optional - armor (A)
- stainless steel braid (S)
- safety connector (SC)

a b Connector options

Model	Description
ST	Stripped and tinned
0	Blunt cut
1	Microdot 10-32 coaxial, IP50
1A	Microdot 10-32 coaxial, right angle, IP50
2/2F/2T	BNC plug, IP50, male / female / twin-axial
M12	5 socket, molded, IP68
9W	4 socket, threaded, weatherproof, Bendix, IP50
20	LEMO, 7 pin, IP50
6	2 socket, Amphenol, metallic, IP50
6D2	2 pin, suitable for use in Class I Div 2/Zone 2, factory assembled
6GD2	3 pin, suitable for use in Class I Div 2/Zone 2, factory assembled
6GQ/6GQI*	3 socket, high temp, Viton® B boot, IP68
6GSL/6GSLI*	3 socket, Viton® B boot, IP67
6Q/6QI*	2 socket, high temp, Viton® B boot, IP68
6QA/6QAI*	2 socket, high temp, Viton® B boot, IP68
6QN/6QNI*	2 socket, radiation resistant, Neoprene boot/Tefzel® insert, IP68

Mounting accessories

Wilcoxon® model	Image	Description and additional models			
MD series		Two-pole magnetic mounting bases			
		MD020 0.75" diameter, 20 lb force, 1/4-28 tapped hole, non-isolated	MD035 1.00" diameter, 35 lb force, 1/4-28 tapped hole, non-isolated	MD055 1.25" diameter, 55 lb force, 1/4-28 tapped hole, non-isolated	MD0130 2.00" diameter, 130 lb force, 1/4-28 tapped hole, non-isolated
MF series		Flat magnetic mounting bases			
		MF015 0.75" diameter, 15 lb force, 10-32 tapped hole, non-isolated	MF040 1.00" diameter, 40 lb force, 1/4-28 tapped hole, non-isolated	MF075 1.25" diameter, 75 lb force, 1/4-28 tapped hole, non-isolated	MF120 1.50" diameter, 120 lb force, 1/4-28 tapped hole, non-isolated
MT series		Two-pole magnetic mounting bases for triaxial sensors			
		MT075 1.50" diameter, 75 lb force, 1/4-28 tapped hole, non-isolated	MT075A 1.50" diameter, 75 lb force, 10-32 tapped hole, non-isolated		
SF6		SF6 mounting stud 1/4-28 UNF both ends Stainless steel	SF6M mounting stud 1/4-28 UNF to M8 x 1.25 Stainless steel	SF6M-1 mounting stud 1/4-28 UNF to M6 x 1.00 Stainless steel	
SF8		SF8 cementing pad 1/4-28 integral stud 1.00" diameter Stainless steel		SF8-2 cementing pad Includes tapped hole and key notch for consistent axis orientation Use with 993A triaxial sensors	
SF11		Cementing pad 1.00" diameter provides surface for sensor attachment using a MF040 style magnetic mounting base			
SF21		SF21 isolator mounting base 1.00" hex across the flats Isolation protection up to 1,500 volts 1/4-28 to 1/4-28 integral stud		SF22 1.000" diameter, 1/4-28 to M8 integral stud	
				SF23 1.125" diameter, 1/4-28 to 1/4-28 integral stud	
				SF24 1.125" diameter, 1/4-28 to M8 integral stud	
TC1B		Triaxial mounting cube 1.00" on each side Three 1/4-28 tapped holes fit a variety of threaded stud adapter sizes such as M6, M8, 3/8 and 10-32 Additional sizes available for different sized sensors			
VERSIL406		Mounting epoxy Enough glue for up to 5 sensors/mounting pads Package contains both epoxy components separated by a pull tab Max temperature 150° C			
ST101		Spot face tool 1.25 in diameter, pilot drill for 1/4-28 hole, drill depth adjustable			

Mounting considerations

Evaluation of the mounting location of each sensor must be based on the specific machine and vibration source to be monitored. The mounting configuration depends primarily upon dynamic measurement requirements such as frequency and amplitude range. The more intimate the contact between sensor and machine, the better the ability to couple and measure high frequency signals.

Permanent mounting: threaded stud, cementing pad

Threaded stud mounting allows the widest dynamic measurement range and is recommended for permanent monitoring systems, high frequency testing and harsh environments.

Cementing pads approach the high frequency capabilities of stud mounts when used properly, without the need of drilling into the structure. Adhesive selection is critical for long-term reliability.

Adhesives

If the machine cannot be drilled, adhesive mounting can be used although this method will usually damage the accelerometer if removal is required. An adhesive mounting pad is the best alternative to stud mounting.

Magnets and probe tips

Magnetic mounts and probe tips can be used for walkaround monitoring programs. The frequency range of using either mounting method is dramatically reduced when compared to stud or adhesive mounts. Magnetic mounts are available with flat surfaces for flat locations or two pole configurations for curved surfaces. Probe tips should be made of steel and be no longer than six inches.

Enclosures

Wilcoxon's enclosures are designed with the user in mind, enabling quick and safe data acquisition in the harshest industrial environments. Our cost-effective enclosures are rugged and backed by lifetime warranty.

- VibraLINK® (VL) switchboxes feature industry exclusive data ready LEDs indicating stable BOV levels, decreasing collection time
- Differential switching for greater noise immunity
- Radio frequency interference filtering
- Rugged and built to last - NEMA 4/4X ratings, corrosion resistant
- Oversized enclosures for up to 48 channels with spacious interiors for easy wiring
- Models available for every application
- Over 450 user configurable models available
- Available in fiberglass, thermoplastic and stainless steel

Model	Description
Reduction Boxes - RB Series	
RB16BFG	16 channel reduction box, fiberglass, base size, cable grips
RB32EFG	32 channel reduction box, fiberglass, expandable, cable grips
RB16BSG	16 channel reduction box, stainless steel, base size, cable grips
RB32ESG	32 channel reduction box, stainless steel, expandable, cable grips

Reduction boxes

Model	Description
Cable Termination Boxes - CB Series	
CB2	2 channel BNC, termination junction box, cable grips
CBT2-M12-G	2 channel M12, triaxial termination junction box, cable grips
CB4	4 channel BNC, termination junction box, cable grips

Cable termination boxes

Model	Description
Transmitter Enclosures - IT Series	
IT051	DIN-box, single-rail, holds approximately seven IT Transmitters and power supply
IT051C	DIN-box, single-rail, clear cover, same size as iT051
IT052	DIN-box, dual-rail, holds approximately 25 IT Transmitters and power supply

Online continuous monitoring

Switchboxes VLT series

Portable power supplies

Dynamic sensors requiring IEPE power utilize industry standard constant current diode (CCD) power supplies. The power supply contains a voltage source with CCD sufficient to support sensor installations using several hundred feet of cable. Options include battery or AC operated, integration, gain or triaxial configurations.

Complete solutions to meet your needs

Wilcoxon product line

Whether you are working in the field or at the plant, we provide complete solutions to meet your needs.

Our products are known for quality and reliability to keep your critical machinery operating safely and efficiently.

We are your one stop shop for vibration monitoring solutions and accessories for all types of rotating machinery including:

Motors, pumps, fans, compressors, gearboxes, cooling towers, and much more.

Vibration reference sources - portable meters

ReferenceMate® portable handheld shaker

Quickly and easily check operation and set-up of accelerometers and velocity sensors in the field. Check acceleration and velocity measurements with no imperial-metric conversions. Frequency and measurement type can be selected at the push of a button.

ReferenceMate	Specifications
REF2510R	
X	User selectable operating frequencies: 61.4 Hz, 100 Hz, 159.2 Hz
X	Max/min load: 8.8 oz (250 grams)/none
X	Switch selectable RMS or peak
X	Operating temperature range: -15 to +130°F (-10 to +55°C)
X	4x standard AA batteries
X	Up to 40 hours battery life
X	DC power input
X	Protective thermoplastic boot
X	Threaded base for magnet

ReferenceMate portable handheld shaker

MachineryMate® vibration meters

Easy-to-use meters record, analyze and display bearing conditions and vibration values color coded to ISO 10816-3 alarm levels enable quick and reliable machinery health monitoring. Built-in filter bands provide a clear picture of machine problems including unbalance, misalignment and looseness.

MachineryMate kits			Accessories

MachineryMate vibration monitoring and analysis meters

DataMate® software

DataMate is the extremely powerful vibration and analysis software tool designed to be used with the MachineryMate 800 (MAC800) handheld vibration meter.

DataMate Pro works across computer networks to allow access to remote databases and readings that are stored on other computers. This powerful feature enables users to monitor machinery at more than one site.

Hazardous area sensors

Wilcoxon offers the widest selection of hazardous area rated sensors for industrial condition monitoring. Certifications including FM, CSA, ATEX and IECEx offer compliance to customers worldwide. Industrial plants are divided into zones (European and IEC method) or divisions (North American method) according to the likelihood of a potentially explosive atmosphere being present.

Zone 1 (gases) Zone 21 (dusts)	An area in which an explosive mixture is likely to occur in normal operation	Class I Division 1 (gases) Class II Division 1 (dusts)
Zone 2 (gases) Zone 22 (dusts)	An area in which an explosive mixture is not likely to occur in normal operation, and if it occurs it will exist only for a short time	Class I Division 2 (gases) Class II Division 2 (dusts) Class III Division 1 (fibers) Class III Division 2 (fibers)

Process 4-20 mA Loop Powered Sensors

We offer digital vibration solutions that simplify the collection of vibration information from machinery, bringing actionable data directly into the control room.

We've developed a HART sensor which can exchange information directly with distributed control systems, and runs on just 3% of the power required by a standard analog unit, freeing up power for digital processing.

Our iT300 Intelligent Transmitter is a simple interface between your existing sensors and the Cloud. It collects and processes vibration information from your plant, delivering actionable data such as alerts to PLC or SCADA systems. We always look ahead, investing in R&D to make sure you can use vibration analysis to capitalize on the smart manufacturing breakthroughs that will become increasingly standard.

Process Digital Intelligent Transmitter series (iT100/200/300)

Wilcoxon's iT series vibration transmitters convert dynamic sensors' output to a 4-20 mA signal proportional to overall vibration. The 4-20 mA signal interfaces directly with a PLC, DCS or SCADA system for cost effective 24/7 condition monitoring. Pair the Intelligent Transmitter with the programmable iT Alarm for continuous alarming capability. The iT series offers flexibility, and DIN rail mounted units are ideal for balance of plant monitoring of critical assets that currently go unmonitored.

iT Transmitter

- Converts traditional IEPE sensor signals to 4-20 mA output in terms of acceleration, velocity or displacement
- Output RMS, peak or Wilcoxon's exclusive true peak signal
- English or metric units
- Custom ordered with low pass and high pass filters to suit your application
- Buffered dynamic output for extensive online system compatibility
- BNC front panel connector supports portable vibration analyzers
- CE approved

New! iT300

iT Alarm

- Accepts input from an iT Transmitter or any 4-20 mA loop sensor: vibration, temperature, pressure, level, flow, force and speed
- Three field-programmable relays: high or low setpoints with time delay
- Front panel LED readout and push button softkeys
- Programmable time and hysteresis delay prevent false alarms
- Back panel TBUS connection eliminates external wiring between units
- CE approved

iT Alarm

HART-enabled field configurable vibration sensor

HART PCH420V

Vibration measurements optimized for process control. Digital vibration measurement for plant managers. PCH420V programmable transmitter allows vibration data to be accessed using existing HART-enabled process automation and condition monitoring infrastructure.

- Field-configurable vibration sensor
- Three user-configurable bands offer flexibility of condition-based maintenance
- Multi-drop installations enable monitoring of up to 16 sensors through a single address port
- Powered by the network for continuous coverage, and easy integration without extra infrastructure and cable costs
- CE approved

New! HART PCH420V

Wilcoxon Sensing Technologies

Did you know

Wilcoxon vibration monitoring sensors and accessories are designed and built for reliable and long-lasting performance. For decades, our products have been and continue to be used around the world for machinery health monitoring and predictive maintenance to identify faults, plan machinery repairs, and keep machinery functioning as long as possible without failure. Shouldn't improved machine reliability, better machine efficiency, and reduced downtime be your goal?

How are your machines working?

Make a smart investment. Monitor your rotating machinery including motors, pumps, fans, gearboxes, compressors, turbines, conveyors rollers, engines, machine tools with Wilcoxon reliable, high quality vibration monitoring solutions.

Need vibration monitoring guidance and expertise?

We are here to provide valuable and stress-free vibration monitoring solution guidance.

- Technical experts recommend the features and products you need
- Responsive, well-informed customer support throughout order process

We've got you covered. Informed decisions. Smart investments.

Detect faults early on your rotating machines, and minimize downtime. See some of the industries we serve, and the products we recommend by visiting our website, www.wilcoxon.com

FIND YOUR PRODUCT

Log onto buy.wilcoxon.com

One stop shop for your vibration monitoring needs. Take advantage of online shopping convenience for specialty and general purpose sensors, cables and connectors, mounting accessories, enclosures, portable meters, intelligent transmitters.

Machine Vibration Monitoring
Wilcoxon is here to help you succeed

Service and support

Wilcoxon expert engineers, knowledgeable technicians and responsive, well-informed customer support team are all here to help you make the most of our reliable vibration monitoring products and accessories for your application and environment.

From start to finish our experts, with decades of industry experience, are ready to guide and support you. When you purchase Wilcoxon Sensing Technologies® product range of vibration sensors and accessories, you should feel completely confident that you have a dependable supplier staffed by a dedicated team.

Calibration

All Wilcoxon Sensing Technologies® sensors are fully calibrated before they leave our factory. Our high-quality sensors maintain stable performance and typically do not require calibration over the life of the product. For certain applications requiring additional calibration, our experienced team provides calibrations conforming to NIST standards in accordance with ISO 9001:2000.

Quality approvals

Our quality policy guides everything we do, from supplier relationships and customer satisfaction, to product development, environmental health and safety. We strive to supply on time, reliable, safe, cost-effective and innovative products and services. If you have any quality certificates and product certifications questions, please contact us.

Custom-designed products

Wilcoxon's capabilities provide the perfect fit for your unique vibration application. We offer custom vibration monitoring solutions for many industries and important applications. If you have a unique vibration application, our experienced engineering team and research scientists can work with you to produce a new and customized product to meet your vibration monitoring need. Call 1-800-WILCOXON to discuss your requirement with one of our experts, or email your requirement directly to info@wilcoxon.com.

Product modification

We offer thousands of standard Wilcoxon Sensing Technologies® range of products for a variety of vibration applications. Our technical services department performs simple to complex modifications to existing products. With our extensive expertise and technical advice, we provide complete monitoring solutions from rapid prototypes to manufacturing and delivery. Common product modifications include packaging, output sensitivity, connector type, frequency response, custom bias output voltage, output type, added temperature sensor, radiation resistance, underwater protection. Products for customization include industrial accelerometers, 4-20 mA sensors and transmitters, cable assemblies, vibration shakers, hazardous area sensors, hydrophones, underwater and seismic sensors, enclosures including switch, junction and termination boxes.

Repair

Wilcoxon Sensing Technologies® product range of sensors have the highest mean time between failure (MTBF) in the industry - greater than 25 years. We stand by each of the tens of thousands of units currently installed and monitoring vibration of critical machines running important manufacturing processes across industries around the world. If any product should ever fail within five years, we will repair or replace it at no charge. In the unlikely event that a repair is needed, our experienced professionals are ready to help. We want to ensure your sensor is everything that you need to get the job done. Remember we are always a convenient email or phone call away. Contact our customer service team for a Return Material Authorization (RMA) number.
