

Product Discontinuation Notice

3M™ Pneumatic Press, 3830 Series & 3M™ Sub-Assembly Shaft/Tool, 3830

Issue Number: 907

Date: December 12, 2014

Effective immediately, 3M is discontinuing the Pneumatic Press, 3830 Series (80-6101-9178-7) because we can no longer source a key component. For this reason there will be no last time buy. Also discontinued is the associated 3M Sub-Assembly Shaft/Tool 3830 (78-8054-5927-4).

Alternate Solution

The following alternative tooling options are available:

1. 3M™ Standard Assembly Press, 3640 Series (80-6100-7882-8) and
2. 3M™ Heavy-Duty Assembly Press, 3335 Series (80-6100-3208-0).

These are adjustable parallel-action devices designed to achieve proper displacement of cable insulation by 'U' contacts as well as right cover seating. These durable presses are ruggedly engineered for strenuous assembly requirements. They are portable or can be mounted on a bench or table top.

Actions Required

1. Identify the parts on your database and revising their status as obsolete;
2. Contact past users of the Pneumatic Press and advising them of this end-of-line announcement.
