## ● Purpose

Sharp Corporation has advised that they will be restructuring their optoelectronics business. To improve efficiency, production of the following part numbers will be **moved** from their current factory location in **Indonesia** to a new factory in Henan, **China** or to an existing factory in Zhuhai, **China**.

*This PCN was previously announced in October of 2019. However, due to impact of coronavirus in China, production at new factory location will be delayed 6 months. Correspondingly, the Last-Time-Buy date for parts produced at current Indonesia factory location will be extended by 6 months. These dates are subject to further change depending on how the coronavirus situation evolves in upcoming months.*

Part numbers will not be affected by this factory move. However, there will be 4M (Machine, Material, Method, Man) changes depending on the part series.
