4.0 RATINGS:

4.1 VOLTAGE

600 Volts

Connector Rating per UL-1977

Connector voltage rating meets the connector approval level defined by UL 1977, Sect. 11 for spacing per table 11.1. Example: 1.2 mm for ≥ 250 volt; 3.2 mm for ≤ 250 volt.

Exception taken for spacing less than those specified are permitted, if the device complies with the requirements in the dielectric voltage withstanding test per Sect. 17.

Application Voltage Guideline

For application voltage requirements please refer to UL-60950 or other applicable standards, the creepage & clearance also needs to be determined based upon pads/traces on the PCB.

4.2 CURRENT ON APPLICABLE WIRES

See Temp Vs Current charts in section 6.0 for applicable current rating per application.

**Current rating is application dependent. The ratings should be used as a guideline only. Appropriate de-rating is required per ambient conditions, bussbar size, gross heating from adjacent modules or components, and other factors that influence connector performance. Wire type and stranding, tin coated or bare copper, wire length & crimp quality are other factors that influence current rating*

4.3 TEMPERATURE

Operating: -40°C to + 125°C (including T-Rise from load)
Storage/Non-operating: -40°C to + 85°C

Temperature life tested per EIA 364-17 Method A for 114 hrs@125°C per table 8 to meet field temperature of 85°C for 10 years life.

Further testing completed per USCAR-2 Rev6 for 1008 hrs@150°C. See 2043131000-TS

4.4 CONNECTOR DURABILITY

200 Cycles mechanical / non environmental durability. *
*Based on EIA-364-1000.01 test method C section 7

5.0 QUALIFICATION

Laboratory condition and sample selection are in accordance with EIA-364-1000.01.
See page 17 for detail test sequence of EIA-364-1000.01
