

May 30, 2018

Crouzet's motor product series 808360-808370 will be phased-out immediately. The immediate phase out is due to a component obsolescence required to produce the series. And due to low to no sales on the ranges, we will not be seeking a replacement solution for this component.

The 808350 motor series could be a possible replacement for respective similar sizes, but this would not be a direct product replacement.

Please see separate Excel file of all part numbers to obsolete effective the date of this notice.

Thank you.

A handwritten signature in blue ink that reads 'Jill Wagar'.
