**Product Discontinuation for 3M™ Mini Delta Ribbon (MDR) Cable Assemblies using the v51.6 Cable**

3M will be discontinuing 3M™ Mini Delta Ribbon (MDR) Cable Assemblies using the v51.6 cable. The suggested crosses are the cable assemblies using the v51.6b cable, a PoCL-based, medium flex cable. 3M's supplier has discontinued the v51.6 cable, therefore we recommend switching to the suggested cross immediately. However, the end user is solely responsible for evaluating the recommended product and determining whether it is fit for particular purpose and suitable for their method of application. Last time buy orders will be fulfilled from our existing v51.6 cable stock, however a last time buy period cannot be guaranteed.

Please see the list of impacted part configurations below with the suggested crosses.
