## Product Change Notice (PCN)

R1 terminal option no longer offered on D42 switch

ZF Electronic Systems would like to inform you that the “R1” terminal option for the D42 base switch will no longer be offered. Customers in need of the “R1” terminal function can still purchase the D43 series switches because they have the same operating force as the D42. The only difference is the current ratings going from 3amps to 6 amps.

Here are the affected D42 part numbers

D423-R1RA-G2 (customers will need to order **D433-R1RA**)  
D423-R1RD-G2 (customers will need to order **D433-R1RD**)  
D423-R1TD-G2 (customers will need to order **D433-R1TD**)  
D429-R1AA-G2 (customers will need to order **D439-R1AA**)  
D429-R1LD-G2 (customers will need to order **D439-R1LD**)  
D429-R1LL-G2 (customers will need to order **D439-R1LL**)  
D429-R1MD-G2 (customers will need to order **D439-R1MD**)  
D429-R1ML-G2 (customers will need to order **D439-R1ML**)

**As a reminder all D42 stock is still good stock to sell.**

Customers will need to order D43 versions going forward. **Pricing and lead times remain the same.**

This change is effective immediately.

Kind regards,

Ryan Eder  
Senior Product Marketing Manager
