DATA SHEET

SKY67183-396LF: 400 to 6000 MHz Broadband Low-Noise Amplifier

Applications

- FDD and TDD 4G LTE and 5G NR systems
- Active antenna array and massive MIMO
- Receive LNA for micro-cell, macro-cell, and small cell base stations
- Land mobile radios and military communications
- Low-noise broadband gain block and driver amplifier

Features

- Low-noise amplifier:
  - Very low noise figure
  - Temperature and process-stable active bias up to +115 °C
  - Wide operating voltage range
  - Low gain slope over operating band
  - Excellent input return loss
- Integrated controller:
  - Stable amplifier bias
  - Temperature compensation
  - True logic level thresholds
  - Fast response time
- Excellent broadband flat gain performance
- Minimal BOM count
- Low current I_{DD} 56 mA @ 5 V
- Fast rise/fall time ENABLE function suitable for TDD application
- Miniature DFN (8-pin, 2 x 2 mm) package (MSL1 @ 260 °C per JEDEC J-STD-020)

Skyworks Green™ products are compliant with all applicable legislation and are halogen-free. For additional information, refer to *Skyworks Definition of Green™*, document number SQ04–0074.

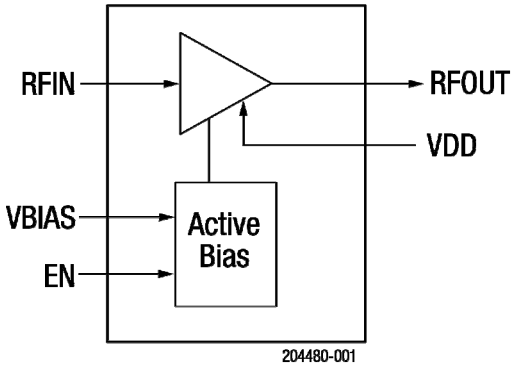

Figure 1. SKY67183-396LF Block Diagram

Description

The SKY67183-396LF is a wide-band low-noise amplifier with superior gain flatness and exceptional linearity.

The compact 2 x 2 mm, 8-pin Dual Flat No Lead packaged LNA is designed for FDD and TDD 4G LTE and 5G NR infrastructure systems operating from 400 to 6000 MHz.

The internal active bias circuitry provides stable performance over temperature and process variation.

A functional block diagram is shown in Figure 1. The pin configuration and package are shown in Figure 2. Signal pin assignments and functional pin descriptions are provided in Table 1.

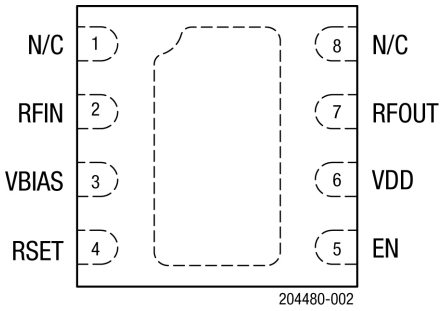

Figure 2. SKY67183-396LF Pinout (Top View)

Table 1. SKY67183-396LF Signal Descriptions

Pin	Name	Description	Pin	Name	Description
1	N/C	No connection (may be connected to ground with no change in performance)	5	EN	Enable voltage to LNA
2	RFIN	RF input (DC blocking capacitor required)	6	VDD	VDD voltage to LNA
3	VBIAS	Bias voltage for input gate	7	RFOUT	RF output. DC blocking capacitor is required.
4	RSET	External resistor to set bias current	8	N/C	No connection (may be connected to ground with no change in performance)

Electrical and Mechanical Specifications

The absolute maximum ratings of the SKY67183-396LF are provided in Table 2. Recommended operating conditions are shown in Table 3. Thermal data is shown in Table 4.

Electrical specifications are provided in Tables 5 and 6.

Table 2. SKY67183-396LF Absolute Maximum Ratings[1]

Parameter	Symbol	Minimum	Maximum	Units
Supply voltage	V_{DD}		5.5	V
LNA enable	EN	-0.5	2.8	V
Quiescent supply current	I_{DQ}		100	mA
RF input power (C/W)	P_{IN}		+22	dBm
Storage temperature	T_{STG}	-40	+150	°C
Operating temperature	T_A	-40	+115	°C
Junction temperature	T_J		+150	°C
Electrostatic discharge:	ESD			
Charged Device Model (CDM), Class C3			1000	V
Human Body Model (HBM), Class 1A			250	V

[1] Exposure to maximum rating conditions for extended periods may reduce device reliability. There is no damage to device with only one parameter set at the limit and all other parameters set at or below their nominal value. Exceeding any of the limits listed here may result in permanent damage to the device.

***ESD HANDLING**: Although this device is designed to be as robust as possible, electrostatic discharge (ESD) can damage this device. This device must be protected at all times from ESD when handling or transporting. Static charges may easily produce potentials of several kilovolts on the human body or equipment, which can discharge without detection. Industry-standard ESD handling precautions should be used at all times.*

Table 3. SKY67183-396LF Recommended Operating Conditions

Parameter	Symbol	Min	Typ	Max	Units
Supply voltage	VDD	3.3	5.0	5.25	V
LNA enable:	EN				
ON			0	0.63	V
OFF		1.17	1.8	2.4	V

Table 4. SKY67183-396LF Electrical Specifications: Thermal Data[1]
(V_{DD} = 5.25 V, Enable = GND, T_A = +25 °C, P_{IN} = -20 dBm, Characteristic Impedance [Z_O] = 50 Ω, Unless Otherwise Noted)

Evaluation Board Description

The SKY67183-396LF Evaluation Board is used to test the performance of the SKY67183-396LF LNA. An Evaluation Board schematic diagram is shown below. Bill of Materials (BOMs) for Evaluation Boards optimized for 4200 to 4900 MHz, 3400 to 3800, 2300 to 2700 MHz, and 1700 to 2200 MHz appear in the following pages. An EVB assembly diagram is shown in Figure 46, layer details appear in Figure 47.

Package Dimensions

Typical part marking for the SKY67183-396LF is shown in Figure 48, PCB layout footprint is provided in Figure 49. Package dimensions are shown in Figure 50. Tape and reel dimensions are shown in Figure 51.

Package and Handling Information

Instructions on the shipping container label regarding exposure to moisture after the container seal is broken must be followed. Otherwise, problems related to moisture absorption may occur when the part is subjected to high temperature during solder assembly.

The SKY67183-396LF is rated to Moisture Sensitivity Level 1 (MSL1) at 260 °C. It can be used for lead or lead-free soldering. For additional information, refer to the Skyworks Application Note, *Solder Reflow Information*, document number 200164.

Care must be taken when attaching this product, whether it is done manually or in a production solder reflow environment. Production quantities of this product are shipped in a standard tape and reel format.
