New AC4490 Development Kit Part Numbers

November 21, 2014

To Our Valued Customers:

Laird Technologies is pleased to announce new development kits for our AC4490 Series of 900 MHz Range-Amplified MultiPoint (RAMP) modules. The new development kits simplify the purchasing decision and allow for users to evaluate multiple types of AC4490 modules with a single kit. Just as with the existing development kits, the new kits will come with two AC4490 Evaluation boards, each with multiple interface options including; RS-232, RS485 and USB Interface. In addition, each kit will come with all the necessary accessories to evaluate the modules. The two evaluation boards will be prepopulated with either AC4490LR-200M modules, AC4490LR-1000M or AC4490-200A modules depending on whether it is an DVK-AC4490LR-200M, DVK-AC4490LR-1000M or DVK-AC4490-200A development kits respectively. In addition, each kit will come with two external antennas for use on the modules.

Detailed instructions on how to use the new development kits to evaluate different types of modules will be provided in the updated User Guide for the Development Kits

End of Life SDK Part Numbers

PART #	Description
SDK-AC4490LR-200M	AC4490LR-200M Developer Kit
SDK-AC4490-200M	AC4490-200M Developer Kit
SDK-AC4490LR-1000M	AC4490LR-1000M Developer Kit
SDK-AC4490-1000M	AC4490-1000M Developer Kit
SDK-AC4490-200A	AC4490-200A Developer Kit

New Part Numbers

PART #	Description
DVK-AC4490-200A	AC4490-200A Developer Kit
DVK-AC4490LR-1000M	AC4490-1000M Developer Kit
DVK-AC4490LR-200M	AC4490-200M Developer Kit
