

Channel ACTION ALERT!

NO: LS-048 **PRODUCT:** D4B-N Safety Limit Switch
DATE: December 2011 **TYPE:** Discontinuation Notice

Partial Discontinuation of D4B-N Metal-Body Safety Limit Switches

Affected models include: 1/2"-14NPT and PG13.5 conduit sizes, 3-conduit versions, replacement parts and certain levers

Part of the D4B-N Metal Body Safety Limit Switch series will be discontinued March 31, 2012; however, Omron Canada will no longer stock these units once current inventory is depleted. All new orders will be migrated to replacement models.

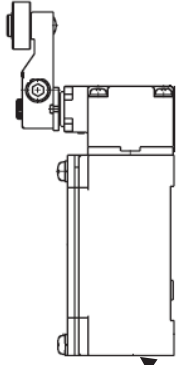

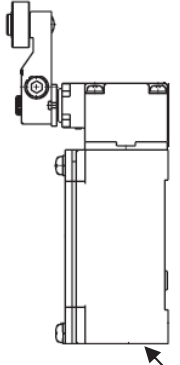

Discontinued Models and Recommended Replacements

- 1/2"-14NPT and PG13.5, 1- and 3-conduit size models will be replaced by the single conduit G1/2 conduit versions
- All 3-conduit versions will be migrated to single conduit versions in available models
- Switch item numbers ending with the following suffixes will no longer be available and the switch must be re-specified; 1R: Roller Lever, Cat whisker, 81: Coil Spring, 87: Plastic rod
- Replacement parts will no longer be available, an entire replacement switch must be ordered

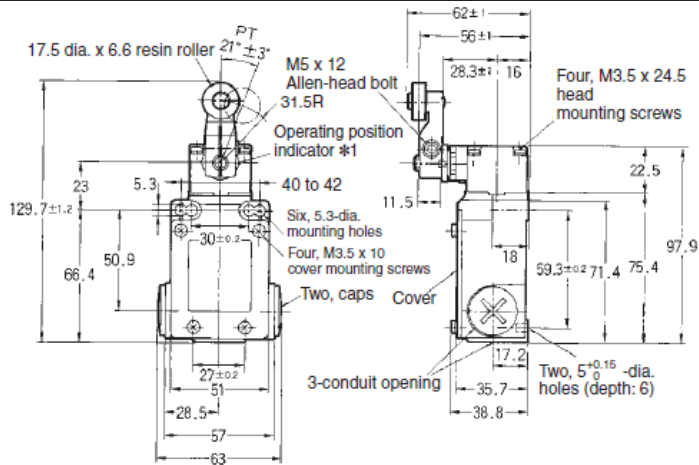

Conduit Differences

Conduit Entrance: 1/2"-14NPT versus G1/2

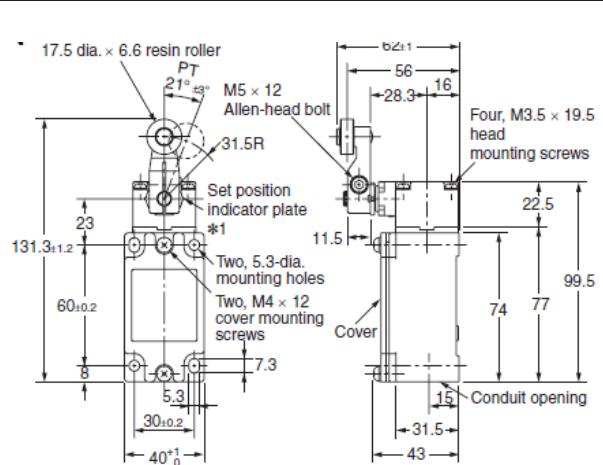

- same number of threads per inch: 14
- same pitch of thread: 0.07143"
- G1/2 conduit entrance does not taper but will mate with most conduit fittings

Replacement Table

The 2nd column of the table below contains models listed in Omron Canada's JDE system. The "Suggested Replacements" are models that are the most compatible to the discontinued model, the main difference being the conduit entrance.

SOS of Safety on Shelf is a new program being implemented to suggest which models to select and purchase as these will be models that Omron Canada will inventory.
