**Product Change Notification**  
**Type of Notification: Changing the safety standard mark on product**

This is to advise you that the following products have been changed.

- 1. Product Being Changed (All part numbers that start with followings)**  
 KHEA120F-□, KHNA120F-□, KHEA240F-□, KHNA240F-□, KHEA480F-□, KHNA480F-□

**2. Description of Change**

The above existing models are certificated with the UL508 standards. And also certificated with the CSA standards (C22.2 No. 107. 1). So it shows the "C-UL (Listed)" mark on product label now. But the safety agency has required an additional certification regarding the CSA standards when the update of UL508 standards.

Cosel tried to meet the requirements to keep the standards, but in conclusion, Cosel gave up and has decided not to keep the CSA standards anymore.

So the safety standard mark on product label will be changed as shown in Table 2.1.

This change does not affect electronic and mechanical specifications, and the UL508 standards are certificated as before (Only the CSA standards become invalid).

And the CSA standards are still valid regarding the existing models that it shows "C-UL" mark on the product label.

Table 2.1 Comparison between Before and After Changes [Example: KHEA240F-24]

No.	Product label	Before	After
1			

**3. PCN Effective Date**

This is a running change, the PCN becomes valid for the production from the middle of March, 2022. Please be advised that the schedule may be changed without prior notice due to stock availability.
