Product/Process Change Notification

Moisture Sensitivity Level (MSL) Reclassification

PN: TF08A226M016APE200

Date: 4/4/22	ID Number (MMDDYY): PCN-040422-UMQ
Affected Products	Polymer Electrolytic Capacitors (KO-CAP®) - Ultrathin solution, Facedown Construction KEMET Part Number: TF08A226M016APE200
Change	The MSL level on the KEMET part number TF08A226M016APE200 will be reclassified from the previous given 3 to a new rating 4.
Justification and Benefits	To prevent internal stress in these components due to moisture absorption, damage during solder reflow and to ensure proper handling and storage.
Effective Date and Identification	Labels over moisture barrier bags will reflect the new level starting shipments of March 18, 2022. Series online datasheet and spec sheet for both part numbers will be updated for May 2022.
