LF PTN# A0088 Obsolescence Notification for Aftermarket materials with Printed Graphics

Dear Valued Customer,

In an effort to remove redundancies in our Product Offerings, Littelfuse is obsolescing duplicate material numbers in our Blister Packs and other materials with printed graphics. The materials to be made obsolete have our “new” graphics with the quad-language graphics: English, Spanish, French and German.

We are in the final phase of upgrading our standard materials with the same graphics and quad-language as the affected parts, which renders the affected parts redundant. Going forward, the standard parts will be identical to the affected parts, but the part numbers and UPC codes are different.

Attached please find the list of affected parts, as well as the part numbers and UPC codes of the replacement materials.

Littelfuse will continue to accept orders under the old part numbers through November 27 2015. After November 27 2015 Littelfuse will only accept orders under the new part numbers. The new part numbers are currently in production, and available for immediate shipment.

Please contact your local Littelfuse representative if you have any additional questions. We will be pleased to answer any questions you may have. Thank you for your continued support.

Best Regards,

Jenny Kiolbasa
