

USB 3-in-1 Sync and Charge Cable - Micro B / Type-C / Lightning

PRODUCT ID: 3679

As USB technology evolves you'll want the One Cable To Sync/Charge All Things (or, at least, portable devices with Micro-B, Type C, or Lightning ports) and this cable will do the job nicely

This very nice USB 3-in-1 Charging Cable looks like woven mithril forged from the Mines of Moria. It's a very handy item to have on a quest because everyone in the Fellowship wants to charge their phones at the Prancing Pony. And, what to do when everyone's phone has a different connector and, unsurprisingly, a Brandybuck and a fool of a Took forgot to pack theirs? Luckily, you can charge a wide variety of smartphones and devices with this cable, iPhones, Android, **Metro M0 Express**, etc!

Unlike most cables, these are not just charging cables, but also work as data-sync cables, for iOS, Android and other devices. The clever adapter caps make setup easy, just stack whichever connector you need!

TECHNICAL DETAILS

Length: 100cm / ~39"

Product Weight: 24.0g / 0.8oz
