Change Description:	As to 85876, 70231 and 89039 series Metral power Receptacle, with the plating change to GXT™ (Gold over Palladium Nickel alloy over Nickel) and Lead-free version, the original -1xx, -2xx, -3xx, -9xx, -2xxLF and -9xxLF will change to be redundant & repeated, some need to be removed and replaced by the -1xxLF or -3xxLF maintained.			
Reason for Change:	Telcordia GR1217-Core level Central Office (CO) has become specification of reference for performance of Metral applications. FCI converted Metral Power receptacle specifications from plating thickness based to performance based. So the repeated and redundant P/Ns MUST be removed.
