

Product Change Notice

Classification of change:	Change of components
Description of change:	Board adaptation changed due to component unavailability
Reason for change:	Sourcing challenges for humidity sensor HTS221TR from ST
Expected influence on quality, reliability, and performance:	This change does not affect the customer experience of this product since the humidity sensor HTS221TR is not being used in the kit's content journey.
Products affected:	AKX00028 Arduino Tiny ML Kit
Time schedule:	Start shipment date: 1st April 2022 Last time buy date: N/A Last time shipment date: N/A
Qualification data:	N/A
Issued by:	Lotte Andersen, Education Business Unit Lead
Contact information:	For questions or comments, please contact your Arduino sales representative.

Notice

As part of an ongoing effort to source materials on time for educational calendars and for Tiny Machine Learning kit needs, we applied the following change to this product:

- Removed humidity sensor HTS221TR (originally manufactured by ST) for the Nano BLE Sense board, resulting in a lighter version of the board. This variation does not affect the functionality and purpose of this educational kit since this sensor is not used in the customer journey.

Open-source software and documentation related to the Arduino Nano BLE Sense is fully compatible with the lighter version of this board (without humidity sensor). The corresponding technical information will be available at the following URL:

<https://docs.arduino.cc/hardware/nano-33-ble-sense>
