

NI is discontinuing numerous interface products. You are receiving this letter because you have purchased one or more of these products in the past.

At NI, we are committed to our customers' success. Therefore, we will continue to offer the affected products for sale until either **December 31, 2021**, or **March 31, 2022**, depending on the part number (PN). **(For a complete list of affected PNs and their respective last time buy dates, please refer to the full PN list attached.)**

We will fill orders on a first-come, first-served basis until supplies are exhausted, based on the delivery date. We cannot guarantee that all orders will be filled. If you do not plan to transition to a replacement offering, we recommend you purchase all future-required units in this timeframe.

Once the lifetime buy date has passed, NI will continue to offer repair services for these products until either **December 31, 2022**, or **March 31, 2023**, depending on which last time buy date was specified for each PN. After that time, NI will no longer guarantee the availability of repair services. To discuss extended availability and support for these products, please contact your local NI field sales representative.

Product Upgrade Paths

NI offers a recommended replacement for new and existing applications for most of the affected products. These recommendations can be found in the attached PN list. Migrating existing applications to the new hardware options should be straightforward, but if you have any questions on upgrading to the recommended replacements, please contact technical support at ni.com/support.

If you would like help in determining whether you should migrate or upgrade your existing system(s), our [migration and upgrade-qualified NI Partners](#) are available to consult with you.

We apologize for any inconvenience this may cause you. If you have any questions or concerns, please contact your local sales representative.

Best regards,

Jen Saucedo
