## TE Connectivity

Product Change Notification: P-19-017488

PCN Date: 11-JUN-19

TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

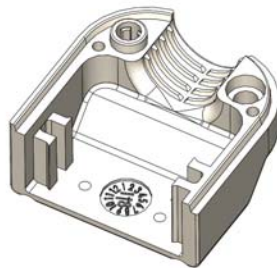

**General Product Description:**

Suppression of recess holes

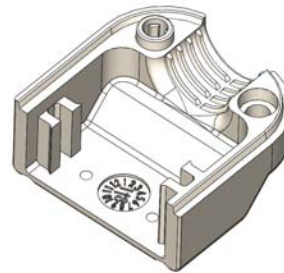

**Description of Changes**

Holes to be suppressed. note : presently , the holes are blind. Making them though holes is not an option, Panasonic required parts shall not have visible holes when accessory is closed .

Present design

Proposed design

Metallization default aspect

**Reason for Changes:**

Product improvement. During the plating process, the holes located next to the screw passage (material recess) can generate brown stains or lack of plating. note: purpose of the holes was to avoid shrinkage marks ( suggestion of the molding dept , during design review , in order to have as constant as possible material thickness. )
