Phoenix Contact's factory has announced the following product(s) is going to be discontinued. Existing specifications will be met or exceeded. Technical support of the discontinued product will continue, as required. Please review and acknowledge this document and take the appropriate action with respect to your existing inventory and ordering replacement parts.

Description for Product Discontinuation

Dear Sir or Madam

It is always our goal to offer you state-of-the-art and up-to-date products for your application. For this reason, it may be necessary from time to time for economical or technical reasons to remove one or more components from our product range.

We hereby discontinue the articles and accessory parts stated on the attached list. See the suggested substitute parts as listed.

In order to cover your foreseeable demand of replacement parts, you will still be able to order the mentioned products until 01/31/2020. The last shipment will be by 05/01/2020.

It is our intention to provide you with replacement parts for a long enough period (10 years, as a rule). We cannot guarantee this support in this instance, however, as there is a dependency of various component supplies which we can only influence in a limited capacity.

It will be our pleasure to support you in case of any changeover of your machine or system configuration. If you have any questions or if you would like to make an appointment, please contact our Technical Service Team (1-800-322-3225; US_Sub_Tech_Service@phoenixcontact.com). We look forward to supporting you.

We thank you for your understanding and look forward to our continued business relationship.

Kind regards

Phoenix Contact GmbH & Co. KG
