Description for Product Change Notification

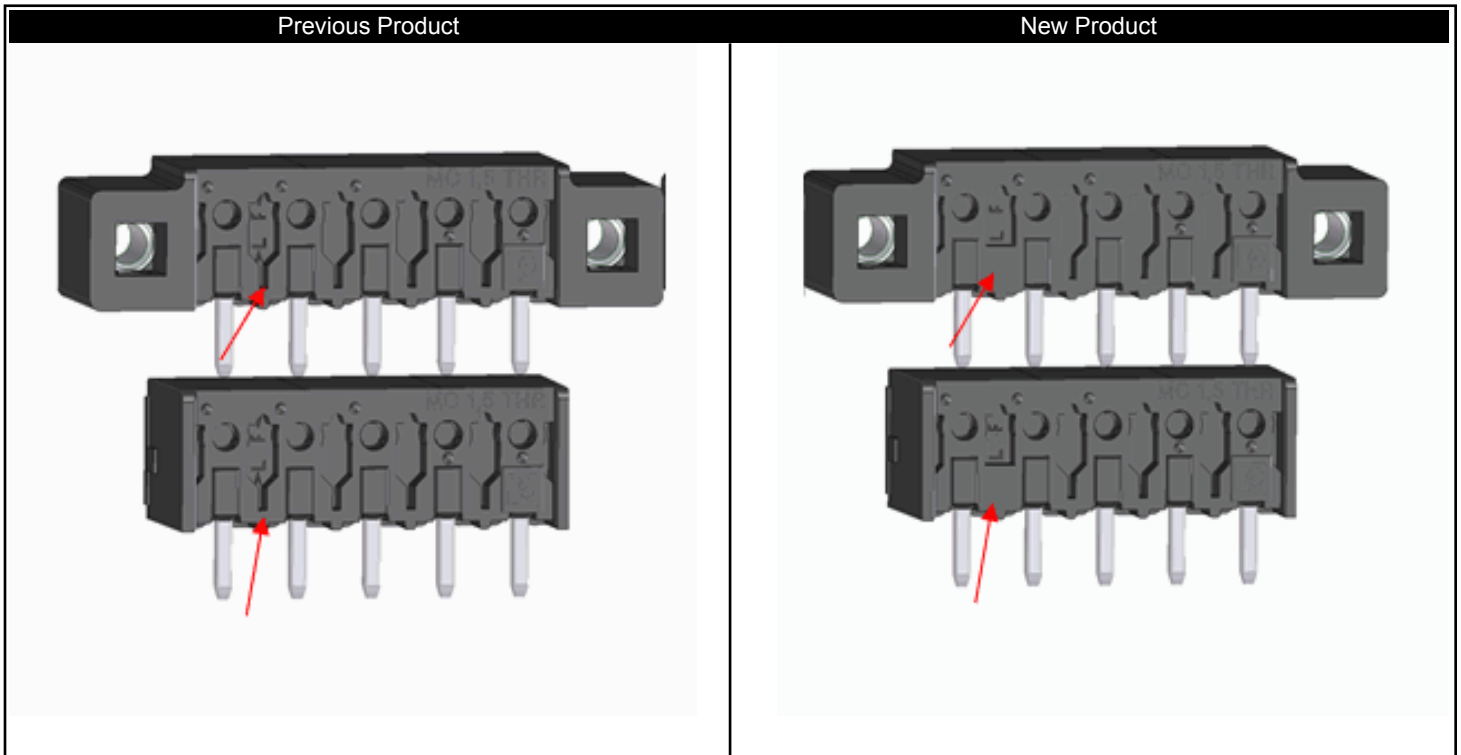

Due to optimization of the production process a notch on the backside of the connector will be reduced in size. The change could be on the left or on right side of the connector. The outer dimensions, the PCB layout and other technical data are not affected by the modification. During the conversion phase both versions are delivered, depending on the inventory and number of poles. New versions will be identified by a change in version code (revision level) as indicated on the attached Excel spreadsheet.
