**Subject: Canadian UL Approvals For CNN-E and TLS Series Products**

Document# LFPCN\_PG0107

Date: 9/11/2019

This letter is to inform Littelfuse Sales, Sales Support & Customers of the addition of Underwriters Laboratories Canadian market certifications for CNN-E and TLS series. With this change we will add Canada to the UL certification and new production products will be marked with these Canadian approvals. See below for images of the new marking.

**No changes have taken place in the products' construction or assembly processes. This is simply an expansion of the approvals to encompass the Canadian market.**

This will be a running product marking change scheduled as follows:

CNN-E Series Fuses: Littelfuse will add the Canadian approval markings on October 31, 2019

TLS Series Fuses: Littelfuse will add the Canadian approval markings on December 31, 2019

Once inventory has been depleted for each of the part series, products with the updated markings will ship from our warehouse. For additional product information please contact your Littelfuse Representative.

Sincerely,
