Product Change Notification	**Date** August 23, 2021
Product	Digi ConnectCore 6UL

Reason for Change

☐	Technical Requirement	☐	Product Transition
☐	Customer Requirement	☐	Product Discontinuation
☐	Quality Improvement	☒	Product Enhancement
		☐	Other (Brand Change)

Description of change	The U-Boot image has been updated to 2020.04-r4.2. The underside serial number and part number barcode labels have been combined into one label for manufacturing purposes. *See attachment

Affected Part Numbers	See attachment

Quality Issues	The U-boot image is typically used only for factory testing and customers use their own image for the final product. The combined label is located on the underside of the Printed Circuit Board, and is for factory use and would not be used for customer identification. There is still a top side label attached to the shield which contains all the part information needed for customer identification.

Contact/Questions	Please contact your Digi Sales Representative or Technical Support team via email at tech.support@digi.com

Issued By	Digi International Embedded Product Management

*Label located underside of PCB will be combined QR code
