Product Discontinuation

PDN-IF-5716-2020

Business Unit	Product Line Code	Type of Change	Action	Date of Issue
IF - Interface Components	CK4	Product Discontinuation	Notify Distributors and Field	8/4/2020

Phoenix Contact's factory has announced the following product(s) is going to be discontinued. Existing specifications will be met or exceeded. Technical support of the discontinued product will continue, as required. Please review and acknowledge this document and take the appropriate action with respect to your existing inventory and ordering replacement parts.

Description for Product Discontinuation

The ETD-BL-1T series of slimline (6.2mm) timer relays have been discontinued. The successor products are new multi-function versions that replace 32 part numbers with just 2 parts. The new PLC-TR timer relay can replace the existing portfolio by offering Time Off Delay (TOF), Time On Delay (TON), and flasher functions all in one product. Additionally, the time ranges are now configurable on the product; nominal ranges from .1 seconds to 300 minutes are included onboard.

In terms of product specifications, the form-factor, functionality, and technical ratings are identical. The main difference between the two series is the ability to program the PLC-TR relays. It is possible to select time ranges and timer functions through the use of DIP switches instead of needing to select those attributes on a part-by-part basis. This improvement will significantly streamline inventory and ensures the right timer relay is always on hand.

The new PLC-TR relays continue to use the same PLC Relay form-factor and they remain compatible with the FBST bridges used with both the standard PLC Relay series and ETD-BL-1T timer relays. PLC-TR relays are UL Listed and can be ordered with screw or PT connections.

Stock Status

Can existing stock still be used?	Yes
Is mixture of stock acceptable?	No
