

CLEANROOM TACKY MATS ALUMINUM FRAME

Our cleanroom compatible aluminum frame provides a moveable base for mounting adhesive tacky mats.

Our aluminum frames provide a stable base for tacky mats without the limitations of mats secured directly to the floor. Often, tacky mats use their own adhesion to mount directly on the floor at the entry of controlled environments but this is not always possible. Carpeted, slick, damp or dirty floors may cause the mat to pull up, deform or perform poorly. Additionally, traffic patterns may change or the mat is needed in another location altogether.

Our tacky mats frames are made with anodized aluminum beveled edges which creates a smooth transition for foot traffic or cart wheels. The plastic base is complete with a non-skid bottom. The aluminum frame has a finished, professional look that improves the appearance of tacky mats. They are supplied fully assembled, ready for use, and are easy to clean.

Our mat frames are a dependable solutions for use in semiconductor, food industry, aerospace, laboratories, surgery rooms, home, office, construction and other environments that demand cleanliness.

Fits Tacky Mat Sizes: 18x36; 24"x36"; 26"x45". *Some trimming of the tacky mat may be required.*
