

End of Life Announcement

Date November 15th 2019
No. 025-19

TRACO POWER TSP-3P Series

To whom it may concern

Certain safety standards in the automation and control industry will see some major changes by the end of 2020. Recertification costs for above series are excessive compared with the potential revenue.

In consequence, TRACO is forced to declare the immediate production discontinuation of

TSP240-124-3PAC400
TSP240-124-3PAC500
TSP480-124-3PAC400
TSP480-124-3PAC500
TSP960-124-3PAC400
TSP960-124-3PAC500

Mass production for above models has been stopped but affected customers may order the remaining factory and distribution stock. They may also evaluate TRACO POWER TSP-WR series which offers a similar input range if that is the requirement.

We thank you for your understanding and apologize for any resulting inconveniences.

Simeon Tresp
Product Manager
