

Customer Notification
Potentiometer and Trimmer Price Book Update

November 15, 2019

Dear Valued Customer,

We are updating the Price Book for the Variables BU to provide up to date information on lead-times, MOQs/MRQs, shelf package type and shelf package quantity for selected part numbers. We are also removing some invalid part numbers. See Appendix A below and list attached(EOL1041).

No pricing changes are being made with this update. The changes are effective January 14, 2020.

Here's the summary:

- Shelf Package Type / Shelf Pack Quantity / MOQs / MRQs data has been updated on selected part numbers
- A wide variety of lead times have been updated to reflect improvements

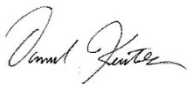

And we want to remind you of the following two new initiatives to help our distributors, put in place previously in 2019:

- The addition of volume-based "2nd Column Pricing" that is 3% lower (relative to book price) for volumes 5X the MOQ. This will be available across most of our Trimmer product line.
- The new Design Registration Program now available across most of our Potentiometer line to reward distributors and representatives who create new demand

TT Electronics firmly believes that our distributor relationships are critical to our success. We are committed to providing you the best quality, service, and value, which will allow us to grow together.

To best serve you and answer questions on replacement products, all inquiries and requests should be directed to your local representative, regional sales manager, or customer service department.

Best Regards,

David M. Kertes, Vice President of Global Sales and Marketing
TT Electronics – Sensors and Specialist Components
