1. Introduction

NimbeLink is changing the S2C Link product line from a fully assembled boxed-modem format to a separate Skywire modem and S2C Link accessory kit.

Customers that previously purchased S2C Link products can now purchase a Skywire modem specific to their cellular technology needs and a separate S2C Link kit which contains all the pieces to build an S2C Link modem.

Customers with minimum order of 250 pieces can purchase fully assembled units by ordering a custom part number.

The last time buy for existing S2C Link part numbers is December 31st 2016. Last time shipments must be scheduled prior to January 31st 2017.

2. Migration Overview

This table outlines the S2C Link orderable part numbers that are now End-Of-Life and how they map to the replacement Skywire modem and S2C Link kit of parts. The antennas and power supplies provided in the S2C Link retail kits are also listed for reference.
