

Digi-Key Corporation

12th April 2018

PCN (Product Change Notification) reference: **2018/04**

Subject: 0603 FB6 Part Number Standardisation

Dear Customer,

The purpose of this notification is to advise that Knowles is changing the 0603 FB6 part number to a standard 0603 part number.

Knowles part numbers being changed:

0603	J or Y	050	0104	J, K or M	E or X	R or T	FB6
Case Size	Termination	Voltage	Capacitance	Capacitance Tolerance	Dielectric	Packaging	Suffix Code

Change to Knowles standard part number:

0603	J or Y	050	0104	J, K or M	E or X	R or T	FB6
Case Size	Termination (no change)	Voltage	Capacitance	Capacitance Tolerance (no change)	Dielectric (no change)	Packaging	FB6 deleted from part number

The reason for the change is simply administration, the standard part number matches the standard products being supplied. FB6 is a suffix code which is not required to be included in the part number format.

There are no other changes (including no changes to form, fit or function) associated with this PCN.

If you require further information, please contact Knowles sales.

Yours sincerely,

Alice Liu
Quality Manager, Knowles Capacitors

PCN Details

PCN reference: 2018/04
