**Subject: Raw Material Change Impacting LOCTITE® STYCAST Products**

Dear Valued Customer,

The ability of Henkel Corporation ("Henkel") to procure a resin used in the manufacturing of the products listed below has been impacted due to the decision of the supplier of this raw material to production.

To ensure continued supply of these products, Henkel has qualified a new source for the supply of this raw material used in the production of the following LOCTITE® Products:

IDH	Material Description
2056804	LOCTITE STYCAST 2762FT BK
2056963	LOCTITE STYCAST 2850FT BK

As part of the qualification of this new raw material provider, we have completed quality control testing to confirm similarities of the raw material provided by the new source versus the raw material provided by existing approved sources for use in the above products. As a result, Henkel does not believe this change in raw material provider will result in any material impact to:

- Manufacturing process
- Performance of the above products in their respective applications
- Performance properties set forth in applicable Loctite Material Specification, Safety Data Sheet, Technical Data Sheet, or Certificate of Analysis
- Shipping and transportation classifications
- Shelf life and storage conditions
- Pricing
- Part numbers ordering
- Product availability

Products manufactured with the current resin will be available for purchase until the inventory is depleted or until October 1, 2022. After that date, all orders will utilize the resin provided by the new supplier.

Please contact your local sales representative or our Customer and Product Support Group if you require further clarification. We appreciate your continued business and support.

Yours sincerely,  
Penny Gliane
