

PRODUCT SPECIFICATION

1.0 SCOPE

This specification covers the 3.50 mm (0.138 inch) MX150 Unshrouded Through Hole header product line and is intended to mate with the MX150 receptacle connector series 33471 and 33472.

- Only blades have been validated to the test specifications listed in Section 5.0
- Blades do not conform to USCAR Terminal Blade design standard
- Customer is required to validate at both interface and module level
- When mounting or handling the unshrouded header, refrain from any process that can contaminate the surface of the blades, this will critically affect performance

4.0 RATINGS

4.1 VOLTAGE

Operating Voltage: 14 Volts DC Maximum

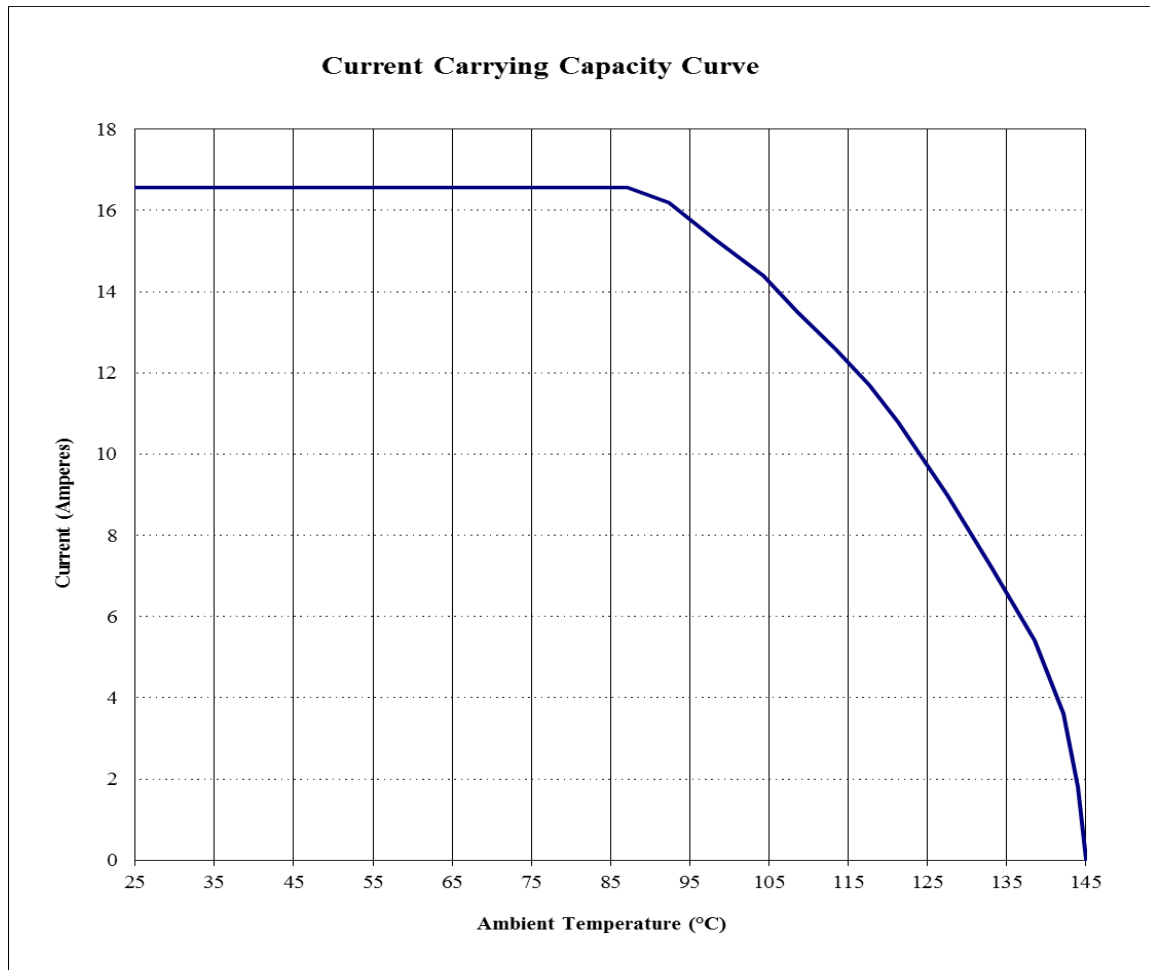

4.2 VOLTAGE - ISOLATION RESISTANCE

100MΩ Minimum when 500 Volts DC between adjacent terminals and terminals to ground.

4.3 CURRENT

Ratings shown below represent maximum current carrying capacity of a single terminal crimped to 14AWG wire in open air based on a 55 °C maximum temperature rise limit over ambient. Note that current is dependent on connector size, ambient temperature, wire gauge, and other related factors. Actual current rating is application dependent and should be evaluated for each use.
