

Remington Industries is a proud supplier of 304 Stainless Steel Mill Stock Flat Bars and Round Rods. Stainless Steel 304 is a general-purpose steel alloy that can be easily welded or formed. It has a high resistance to heat & corrosion, and it responds well to hardening by cold working. Made up of 8 percent nickel and 18 percent chromium, it possesses great oxidation resistance even when used in temperatures up to 871°C (1600°F). This 304 stainless steel meets ASTM A276 specifications.

We offer stainless steel bars and rods in many different sizes; take a look at our selection using the charts below. If you can't find a piece of raw material that meets your specifications, feel free to [contact Remington Industries](#) to see how we can help you with our [Custom Raw Materials Services](#).

- Material: 304 General Purpose Stainless Steel
- Finish: Unpolished (Mill)
- Can be hardened by cold working
- Great strength & corrosion resistance; easily welded or formed
- Specification: ASTM A276
- Available Shapes:
 - Flat Bar/Plate
 - Round Rod

**Remington Industries
is proud to offer our
Custom Raw
Materials Services**

We are proud to offer a range of custom services for raw materials to best meet your needs. With our extensive knowledge of raw materials, experience in the industry, and relevant connections, we can determine product availability and source the materials you need to complete your project.

- We also offer Value-Added Services for your raw materials:
- Cut to Length
 - CNC Turning & Milling
 - Grinding
 - CAD Drawings
 - Prototyping

If you have any questions or need any information about our [Raw Materials Services](#), feel free to contact us! It only takes one call to get experienced assistance.
