Re: Techform TC-533 Peelable Solder Mask

Dear Customers For TC-533 Peelable Mask

We are experiencing severe supply problems with the main raw material used to make this product. We are working diligently in our lab and working closely with our raw material suppliers.

Unfortunately, we do not have a quick solution or a date for resolution of this supply issue.

We do suggest testing other Techspray Peelable solder masks, especially WonderMASK P (part number 2211):

- Non-ammoniated
- Nonflammable
- Easily peelable
- Low odor
- Cure indicator - darkens as it cures
- Compatible with gold and copper leads

Technical data, SDS and requests for samples are available through customer service team or through our website

<https://www.techspray.com/wondermask-p-peelable-solder-mask-2>.

We apologize for any inconvenience caused.

Best regards,

Paul Blair
