New Earthing Cone Design K,E,T,V and W Series

Summary of Change:

- LEMO has modified the design of the earthing cone used in the water-resistant cable mount connectors to allow more space for termination of the cable braid and to provide an indicator for where the braid should be trimmed.
- Size 1 in each Series (1K, 1E, 1T, 1V and 1W) will be modified first, followed by sizes 0, 2, 3, 4 and 5.
- There is no impact on the other internal parts of the plug or free receptacles.
- No change to part numbers.
- No change to price.

Detail of Changes:

The new earthing cone design allows for improved termination of the cable shield. The shield is folded over the outside of the cone and is trimmed to the edge as shown below.

Effective Date:

This modification is currently in process starting with size 1. All other sizes will follow. Product with this modification will begin shipping once legacy version inventory is depleted. If you have any questions or concerns regarding this change, please contact Customer Service or Applications Engineering at 1-800-444-5366 or email: info-us@lemo.com
