Type of notification:	This is an Initial Product/Process Change Notification (IPCEN) sent to customers. IPCENs are issued at least 120 days prior to implementation of the change. An IPCEN is advance notification about an upcoming change and contains general information regarding the change details and devices affected. It also contains the preliminary reliability qualification plan. The completed qualification and characterization data will be included in the Final Product/Process Change Notification (FPCN). This IPCEN notification will be followed by a Final Product/Process Change Notification (FPCN) at least 90 days prior to implementation of the change. In case of questions, contact <PCN.Support@onsemi.com>.

Description and Purpose:
 The reason is that the existing lead frame raw material will be end of life by 2016.
 We will replace the existing lead frame raw material C50710 with C19400 (C50710/C19400: ASTM code).
 The table below shows comparison of mechanical and chemical properties between two materials.

Material Name		C19400(Alternative)	C50710(Existing)
