Amphenol Alden Products Announcement - New Factory Location Shenzhen China

To Our Valued Customers,

Amphenol Alden is pleased to announce that we are moving our Shenzhen, China operations into a larger facility during the second half of 2022. Our continued growth in the medical device sector coupled with an environmental rezoning at our current location has created this exciting opportunity, and we have found an ideal location for our new factory. Highlights are as follows:

Features: 50% increase in manufacturing capacity* adds space for new technology and additional resources to support you

- **100% of current equipment will move to the new factory**
- 50% increase in manufacturing and warehouse floorspace
- 50% increase in dormitory and canteen floorspace
- **80% expansion of our cleanroom area**
- 30% increase in office space
- With options to expand further as we grow

Location: 8 miles from our current location in Shenzhen China* keeps our team intact and minimizes risk

- 8 miles from the current location makes this easy to **retain our trained personnel and team leadership**
- 1.5 miles from local subway trains facilitates those who commute to work via public transportation
- 20 miles from the Shenzhen Airport and 46 miles from HK International Airport so we can once again welcome international visitors post-pandemic

Timing: Q2 and Q3 of 2022* - Sharp focused execution will reduce the time your resources will be needed for qualifications

- Engineering, sales, and office staff in Q2 of this year
- Manufacturing that supports local Chinese OEMs in Q2 of this year

	Product Change Notification	
	PCN Number:	22-0000
	Date:	17 March 2022
	Customer Name:	Digi-Key Electronics

- **Manufacturing for OEM's requiring pre-notification in Q3 of this year**
- Move complete by October of this year

If you purchase products manufactured in our Shenzhen facility, this letter will serve as your **official notification** of our plans to move the manufacturing location of the products we make for your company, in accordance with our Quality Management System. **Details surrounding the relocation of your products to our new facility will be sent under separate cover once we have the specifics of each customer and product fully defined.**

We are excited and pleased to be able to make this announcement in response to excellent business conditions and your commitment to Amphenol Alden as your source for medical device cable assemblies and connectors. Together, we continue to make better interconnect solutions for better patient care.

Sincerely,
 Michael Virusso
