

PRODUCT CHANGE NOTIFICATION

Date Issued: October 7, 2016

Product Identification: 0826 1x2 ICM Product Family

PCN Number: PC2160207

Reason for Change (s): In an effort to continually improve our product, Bel is pleased to announce an update to the plating used on the shields of our 0826 1x2 ICM series, moving from post-plate Ni to pre-plate Ni, to allow for more flexibility in our supply chain in support of goals to reduce lead-time and enhance our Business Continuity Planning (BCP) initiative. The base-material will not change. This is the same plating change we implemented on our 2xN series back in 2014.

These changes will not affect “form, fit, or function”, nor do they affect any other dimensions or electrical parameters of the part. No other related changes to the above series are being implemented at this time.

Description of the Change (s): Bel is updating the shield plating from post plate Ni to pre-plate Ni, all solder tails will continue to be solder-dipped as before. Final dimensions and our OQC (Outgoing Quality Control) cosmetic inspection standard will remain the same.

Planned Timing and Implementation of Change: This change will be capable of implementation after December 1st 2016. Exact dates can be communicated directly to the customer depending on inventory status.

Impact on Quality and Reliability: None.

Availability of Qualification Data: Upon request.

Remarks: None.

Signature: John Hess, ICM Product Manager

A handwritten signature in black ink, appearing to read "R. M. Hess", with a long horizontal line extending to the right.
