To: Whom it may concern

Subject: Amphenol MS3180 and MS3181 Part Marking

This letter is to confirm that Amphenol is a QPL supplier of MS3180 & MS3181 Dust caps. Accordingly we supply parts in compliance with the latest revision per the Society of Automotive Engineers (SAE) specifications. Prior to the SAE Rev D spec, the subject parts were only offered with a cadmium finish. Therefore, there was no finish designation in the part number. After Rev D, when other finishes became available, a finish designation was added to the end of the part number. They are identified as: W (Cadmium), L (Electroless Nickel), A (Anodic Black).

Amphenol supplies QPL qualified parts that have markings in accordance with the latest SAE specifications. Please see below for the historical part number with no finish designation and the current that conforms to the latest specification requirements.

Historical Part Number & Marking	Current Part number & Marking
MS3180-xxC	MS3180-xxCW, CA, CL
MS3180-xxR	MS3180-xxRW, RA, RL
MS3181-xxC	MS3181- xxCW, CA, CL
MS3181-xxN	MS3181-xxNW, NA, NL
MS3181-xxR	MS3181-xxRW, RA, RL
