

February, 2022

Dear Valued Customer,

FDK CORPORATION
Sales Group

Announcement of End of Supply for Indonesia made alkaline battery

Thank you very much for your continued sales activities and interest in FDK's batteries.

This letter is to announce an End of Supply of our alkaline batteries made in Indonesia. In October last year we completed the transfer of all shares in PT FDK INDONESIA, our consolidated subsidiary that manufactures alkaline batteries. Although we have been continuously supplying batteries on an OEM basis from the transferee, it has been agreed by both companies (FDK and the transferee) to conclude this route as of the September 30th, 2022. Therefore, we would like to inform you of a possible last-buy schedule per the following.

- Receipt of last-buy order: March 31st, 2022
- Last shipment (ETD base): September 30th, 2022

We can provide equivalent products manufactured in our Japan factory and are happy to provide to you more details separately via your local sales contact.

Thank you for your understanding and co-operation.

Yours sincerely

Yosuke TANAKA (Mr.)
Senior Sales Manager
Overseas Sales Group
