Product discontinuation

Dear Customer,

Although product lifetime and delivery period at ams AG are longer than at many other suppliers in the semiconductors industry, we are sorry to announce that further production of

“Orion 2K image sensor” (**ordering codes: 301280003, 301280008 and 301280009**)

cannot be supported any longer.

Reason for that is the demand for Orion sensors decreased to such a level that economic production can no longer be warranted. We therefore ask for your kind cooperation in phasing out of this product. To make the phase out as convenient as possible for you, we would like to offer the following conditions:

- Last possible order placement: September 30, 2018
- Last shipment: May 31, 2019
- Minimum order quantity: 1 production lot – 244 pcs (or multiples thereof)
Due to possible yield variances a quantity deviation of +/- 20% has to be accepted by the customer for the last time buy.

As a replacement we can offer the following product going forward:

“Dragster 2K7 LCC” (**ordering code: 301740011**)

This product is not mechanically directly compatible but offers similar resolution and operating speed at a more standard technology. Datasheet can be found online on ams AG website and samples are available upon request.

For any further questions (e.g. definition of an EOL agreement) please feel free to contact our customer support team at any time.

Best regards,

A handwritten signature in black ink, appearing to read 'M. Pflieger'.
